Freelance

Lagos, Nigeria

August 2022

- While working with a team that comprised of a backend and a front-end developer, we worked on an international banking app. I created digital wireframes, low-fidelity prototypes, and high-fidelity prototypes.
- I exceeded the client's expectations by going into thorough research and building an amazing UI design concept with efficiency, I took the project from a design idea to the high-fidelity prototype in 11 hours.

August 2022

- I conducted a competitive analysis of 3 direct and 1 indirect competitor, which built a strong foundation for the project.
- I designed 54 pages of wire frame to be handed over to the other designers for a tech startup company.

UX DESIGN PROJECT EXPERIENCE

A Mobile Banking App

Personal Lead

September 2022

- Designed digital wireframes, mockups, low-fidelity, and high-fidelity prototypes
- Defined the problem by creating a problem statement and a goal statement then I ideated on a solution by creating how-might-we statements, storyboards, crazy eights, and paper wireframes,
- Conducted an intensive user research that comprises of quantitative of 100+ participants and a qualitative analysis of 8 participants, competitive audits, user personas, empathy maps, user journey maps and user stories.

A Mobile App for Online Learning

Team Lead

September 2022

- This was an award-winning competition that required user research and a serious use of the 5 phases of the design process.
- I worked in a team of 4 designers, where we created an equity-focused design for our local community, we were basically designing for social good. We designed an equity-focused online learning platform, while cancelling any bias, conducted interviews of 10 participants and saw ourselves throughout the whole design process and finished the challenge in flying colors.
